Subject: Re: Slauson Tanker

The idea was to apply the threat of ignition and subsurface vapor (BTEX) in order to smoothly transition the site back to a local Public Health agency, with actionable data. Not do-able under OPA.

Ben Castellana Ph.D.
On-Scene Coordinator
US EPA Region 9
Superfund Emergency Response

I spoke with Javier mid last week and provided the contact info for the adjacent property, indicating the scope-of-work elements and site access elements we would like to see. I suggested a meeting to discuss later this week.
